Professional Summary

Experienced Project Management Office (PMO) professional with over 5 years of consulting experience across global digital transformation initiatives. Proven track record of supporting large-scale system implementations, optimizing cross-functional workflows, and driving operational efficiency through structured tracking and reporting. Adept in using tools like Jira, Confluence, and Excel to monitor progress, visualize KPIs, and streamline communication among stakeholders. Bilingual in English and Japanese, with a background in engineering and a strong interest in transitioning into data-driven roles that leverage analytical insight for business impact.

Employment History

Accenture, Tokyo, Japan

Manager

December 2023 - July 2025

- Led PMO operations for a global SAP implementation in the video game industry, managing project tracking, milestone oversight, and status reporting across cross-functional teams and client stakeholders.
- Designed and maintained dashboards and project trackers to monitor KPIs, ensuring visibility into progress, risks, and resourcing.
- Facilitated daily meetings and status reviews with developers, designers, and client leads, streamlining issue resolution and enhancing team alignment.
- Supported executive-level governance activities, including steering committee materials, change request documentation, and escalation tracking.

Key Achievements:

- Developed and maintained dashboards that enhanced visibility into project status and supported timely issue escalation, and reduced man-hours for progress tracking by 50% through automation and standardization.
- Introduced a structured daily escalation framework, accelerating issue resolution and improving cross-team accountability.

Consultant

October 2019 - November 2023

- Supported PMO functions across multiple global projects in e-commerce, automotive, and telecom sectors, focusing on project coordination, stakeholder updates and progress tracking.
- Managed timelines, deliverables, and resources using Jira, Confluence, and Excel, contributing to clear reporting and operational transparency.
- Prepared project documentation including meeting minutes, progress trackers, and stakeholder updates, ensuring clear communication

Key Achievements:

- Improved project communication workflows by implementing consistent meeting cadences and centralized documentation.
- Collaborated with global teams in Japan, US, UK, South Africa, and India, helping align operational workflows during major system implementations and transitions.

SONY Corporation, Tokyo, Japan
Product development engineer

April 2016 - September 2019

- Led a 20-person team as product test lead, managing evaluation of prototype functionality.
- Worked closely with subject matter experts to refine test plans, eliminating unnecessary test items and proposing better-timed evaluations.
- Coordinated with overseas factories and vendors to support mass production.

Key Achievements:

- Proposed test plan improvements that were adopted to streamline evaluation processes.
- Acted as a key coordinator between engineering and overseas factories, ensuring alignment between product specifications and manufacturing needs.
- Played a central role in prototype validation and product readiness activities within the product development cycle.

Education

MSc in Business Analytics (Expected 2026)
Dublin City University, Ireland

September 2025

Bachelor of Information Science and Technology
Hokkaido university - Sapporo, Japan

April 2014 - March 2016
